

目前 Amazon Web Service (AWS) 在臺北有校園招募計劃，兩個實習生職缺面向同學開放，歡迎投遞履歷！

Amazon has come a long way since opening on the World Wide Web in July 1995. Today, we operate retail websites in multiple countries across geographies, offering products in many categories (books, media, digital, electronics etc.) worldwide, and we still like to work hard, have fun and make history!

We're hiring Intern for AWS

Amazon Web Services (AWS) is a highly reliable, scalable, low-cost infrastructure platform in the cloud that powers hundreds of thousands of enterprise, government and start-up business and organizations in over 190 countries around the world. Launched in 2006, Amazon Web Services officially began offering developer customers access to web services – now widely known as cloud computing – based on Amazon's own back-end technology platform.

Using AWS, developers and businesses across all sizes can take advantages of Amazon's expertise and economies of scale to access resources when their business needs them, delivering results faster and at a lower cost. AWS cloud helps customers save substantial costs and time by eliminating their day-to-day management hassle of running their physical datacenters so that they can focus on their core competence. We have a team of personnel who educate and support our customers in the best practices of using cloud services. The team at AWS is committed to providing developers and businesses with tools and services to make their business agile and more efficient.
